

MGI-PAC[®]
Michigan Green Industry
Political Action Committee

Advocating for the Green Industry. We need your support!

Decisions that affect our lives, businesses and communities are a daily occurrence in Lansing. The MGI-PAC helps to provide a cohesive and unified message of who our members are and what we represent. In other words, the PAC serves as an important way to unify landscape professionals and speak in a singular voice on vital public policy matters. The MGI-PAC allows us to represent all MGIA members to law makers through a well-organized, well-informed and united front.

One of the most important tools that we have at our disposal to represent your interests is our political action committee, MGI-PAC.

MGI-PAC is a vehicle that allows us to speak with a united voice on behalf of landscape professionals. In politics, an individual may not be powerful enough to successfully persuade members of the legislature to take action. However, an organized effort representing the combined interests of an association of many like-minded professionals, such as what is offered by the MGI-PAC, offers a more powerful voice.

MGI-PAC increases the opportunity for the interests of landscape professionals to be taken into consideration on a multitude of issues that could impact your business and community. The PAC provides a way for us to be more proactive in getting out front on issues with state office holders. That way, we are involved in the conversations that affect us. In other words, decisions are more likely to be made with us, and not for us.

MGI-PAC commits 100% percent of contributions we receive to landscape professional friendly candidates and campaigns. The MGI-PAC fully complies with all state and federal regulations.

Yes, I would like to help keep the Green Industry Strong. Please accept my contribution to the Michigan Green Industry Political Committee (MGI-PAC)
