- The Challenges of the Snow & Ice Business and Liquids Versus Solids

Snow Plow Rodeo 5:00 p.m.

Dinner 5:30 p.m. (Included!)

The Challenges of the Snow & Ice Business and Liquids Versus Solids

Learning about de-icing options is imperative to the success of your snow removal business. The salt shortage of the past still has an impact on snow removal businesses across Michigan. Though it is apparent that salt supplies will be sufficient this season, the prices have not returned to the inexpensive levels of three years ago and other de-icing options may not only be cost efficient but more practical under certain conditions.

Test-n-Tune®/Compliance 2009 will provide a number of de-icing alternatives that include using liquid deicers to help stretch your budget. Attendees will learn about liquid de-icing products and application methods such as: direct application, overhead sprays, transfer stations and pre-wetting products. Timing of applications and price comparisons to applying salt will be covered as well as application equipment solutions.

The Test-n-Tune®/Compliance 2009 program will wrap up with a short presentation designed to focus on the business end of snow and ice management. Topics covered include bidding/estimating, contracts, employee retention, operational management, equipment maintenance more!

We would like to invite you to join us for a short compliance program sponsored by Cannon Equipment, complete with a **FREE** barbecue dinner. Bring your truck and plow for a **FREE** 10-point check by one of Cannon's factory trained mechanics and receive a **FREE** plow motor oil change. (**No plow maintenance before 2:00 p.m., must be present for service**). Don't miss your chance to win prizes in the Snow Plow Rodeo! If you would like a terrific meal, a chance to win great prizes and an answer to many vehicle compliance questions, do not miss **TEST-N-TUNE®/COMPLIANCE 2009!**
